Presentation

COMPOSTING

Jeremy Marin will speak about his innovative composting methods and answer questions about effective composting techniques

Updates

- Solarize Arlington
- Energy Working Group news
- Occupy Arlington
- Sustainable Middlesex
- The Vision 2020 Standing Committee is asking each task group/committee to look at its activities in light of the Vision 2020 goals. The Environment goal is shown below.

VISION 2020 GOALS ADOPTED MAY 3, 1993: 4. THE ENVIRONMENT

We value the physical beauty and natural habitats of our Town – parks, ponds and wetlands, dramatic vistas and tree-lined streets – as they contribute to the well-being of our community. Recognizing the fragility of our natural resources, we must ensure that Arlington's residential areas, commercial centers, and infrastructure are developed in harmony with environmental concerns. We will be known for our commitment to the preservation of Arlington's beauty, limited open space and resources, as well as our place in the regional and global community.

- New business & upcoming events
